

häwa – Automation of production processes

# Well designed cobot workstations

# Innovative cobot workstations tailored to your application

håwa supports you in implementing a cobot workspace according to your wishes and requirements. We offer cobot workstations from our X-frame modular system. Alternatively, we manufacture cost-effective designs from our proven, stabilized control cabinets with all their advantages. As a third option, håwa can provide you with a custom solution in your customer design. When designing our flexible robot platforms, we benefit from our extensive expertise in a wide range of production areas. Our portfolio includes a large selection of different options for implementing fixed and mobile bases for cobots.

## Advantages of håwa cobot workstations

- Suitable for all types of cobots
- Available with IP66/69 type rating
- Can be customized as stationary or mobile robot bases
- High level of safety thanks to sensor technology and stable construction
- Modular expandability – from entry-level up to high-end
- Made in Germany – quality from håwa

## There are three different types of robot frames that you can have designed at håwa:

### **Cobot base frame or modular cobot base frame: stabilized control cabinets that can be expanded as needed**

- Control cabinet type rating according to IP55
- Cabinet with doors, built-in fans, and mounting plate
- Lifting casters, locking casters, or adjustable feet
- Work plates available in aluminum, aluminum groove profile, powder-coated steel, wood, and other materials

### **Robot table for cobots: Robot tables for cobots from the X-frame modular system**

- Horizontal and vertical struts
- Steel tubing and sheet metal struts
- Control cabinets according to IP55 with mounting plate, fans, and filters
- Various door systems: panels, Makrolon panes
- Full struts and compact struts for easy side assembly
- Lifting casters, locking casters, or adjustable feet
- Handles for moving the racks
- Work plates available in aluminum, aluminum groove profile, powder-coated steel, wood, and other materials

### **Customized cobot workstation: Cobot workstations that are customized to your needs**

- A combination of X-frame machine frame, control cabinets, and cobot units is possible
- Installation of control cabinets in the cobot workstation
- Additional customizable components can be included in the plan depending on requirements
- A custom design
- Alternatively available in stainless steel V2A / V4A

# From entry level up to professional solution – your path to the perfect cobot workplace

## Get off to a smart start with a stabilized control cabinet

Our cobot bases are based on proven control cabinet solutions. They offer a cost-effective entry-level option with low design complexity and high stability. Ideal for initial automation projects – safe, efficient, and ready for immediate use.

## Solve complex requirements efficiently with X-frame

For complex machine frames with industrial robots, häwa offers the X-frame modular system. With horizontal and vertical struts, integrated cable routing, and flexible expansion options, you can design your workplace exactly according to your needs. Whether mobile robot tables or fixed frames – everything is possible. We also offer FEM calculations for systems with high dynamics and low tolerances when picking parts.

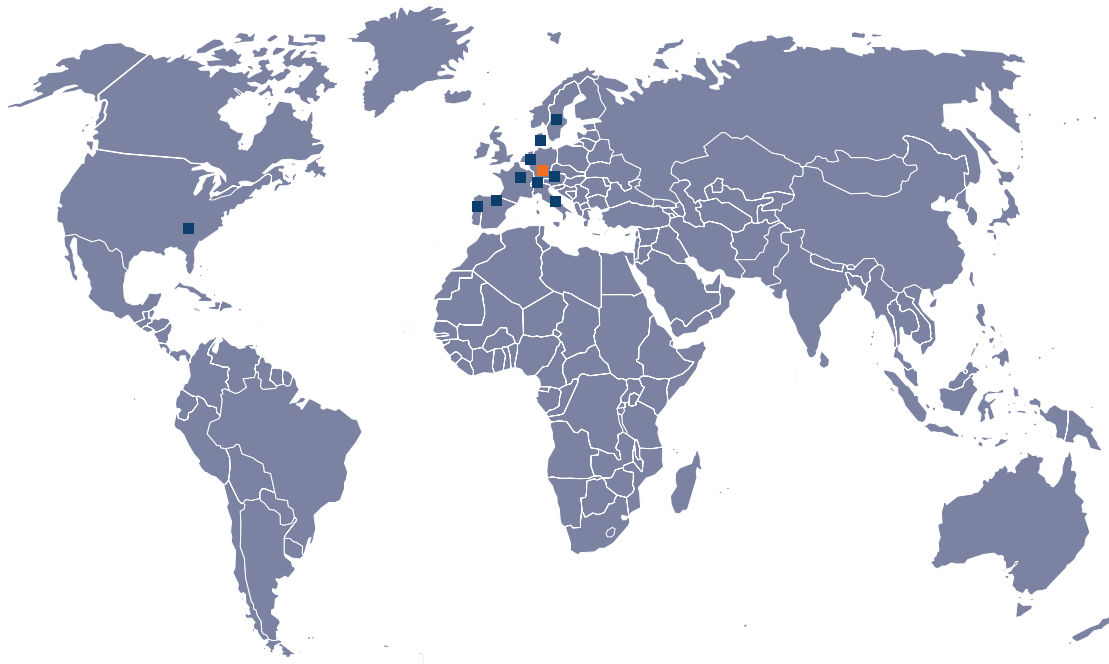

## Let us advise you – individually and personally

Whether you need an entry-level solution or a high-end workstation, we will support you from planning up to implementation. Benefit from our many years of experience and technical expertise.
